CASE OR UTILITY NAME: Liberty Water Your Position: CON

There have been no significant increases or demands on the water system in the last year. To allow a rate increase now would only indicate that the company is using the rate payers to finance their purchase of the system. There has been a significant increase in the number of new vehicles on the road. Are they wasting capital on useless vehicles and personal? The proposed 111% increase is unwarranted and unnecessary. I am currently at the end of the water line. All of the water that I get is not circulated in any way. Should this not be corrected by adding a loop so that the water is flushed?
